

Andrew Nolte

Austin, Texas
anolte512@gmail.com | 281.301.8306

EDUCATION

UT AUSTIN

B.S. IN COMPUTER SCIENCE
TURING SCHOLAR
(CS HONORS)
May 2022

COURSEWORK

Computer Vision Stanford Online
Machine Learning
Differential Equations
Honors Courses:
Artificial Intelligence
Algorithms and Complexity
Operating Systems
Computer Architecture
Data Structures
Discrete Math

MISC. PROJECTS

Tamuhack 2019: Carma
Partial ARM Emulator
Critters (interpreter)
Treaps Implementation
Boggle Game
Markov Text Replicator
Motion Planner (Robotics)

SKILLS

Over 5000 lines:

Python • C++ • Java
• Robot Programming

Over 1000 lines:

C • Web Stack • React.js • Verilog

Familiar:

React Native • SQL

Tools:

Git, Vim, Webflow, Glide,
Keras/Tensorflow, Docker

EXPERIENCE

FACEBOOK Summer 2020 | Menlo Park, CA (virtual)
SOFTWARE ENGINEERING INTERN, MISINFORMATION TEAM

APPLIED RESEARCH LABORATORIES Summer/Fall 2019 | Austin, TX
SOFTWARE ENGINEERING INTERN

Hurricane Harvey Damage Assessment

- Experimented with machine learning techniques in python, delivering both a tile-based classification model and a pixel-based classification model for identifying areas of damage.

Underwater Robot

- Produced OpenCV solution for a tracking problem.
- Linked up code with simulator, greatly increasing development speed.

RECENT PROJECTS

CATAN CSP SOLVER JUNE 2020

A web-app created completely in python which generates a random Catan board given constraints.

PARSEARGS DECEMBER 2019

A simple open source python package that turns python functions into command line functions

FPGA FLIGHT CONTROLLER MAY 2019

Part of a small team that wrote flight control code in verilog, including PID Control, Motor Mixing, and communication protocols, resulting in a flyable drone.

HACKDFW 2019: SYNTYPE FEB 2019

Built recurrent neural network in Python to identify difficult keystroke patterns from real time keyboard input, typing Java code scraped from Github.

WEBCRAWLER AND QUERY ENGINE DEC 2018

Crawled and efficiently indexed a web into a custom data structure.

Made query engine using shunting yard algorithm, supporting complex boolean logic queries. (Essentially made Google Search clone)

TETRIS, TETRIS AI OCT 2018

Programmed Tetris game and Tetris AI in Java, trained using genetic algorithm. The final algorithm is able to clear millions of lines.

HONORS / ACTIVITIES

2018-

Turing Scholars Student Association

2018-

Association for Computing Machinery

2016-2018

Vortx 3735 (Klein ISD Robotics Team), Programming Captain

2010-2018

Boy Scouts of America, Eagle Scout with bronze palm

2015-2018

Zeta Omicron (High School CS honor society)

Placed in various UIL CS competitions, 8th in HP CodeWars 2017
